

Server-Client Chat Application

Hamdan, Parker, Logan, Michael, Riley

CMPSC 311

Dr. Richard Lomotey

Step 1: Open Linux Terminal

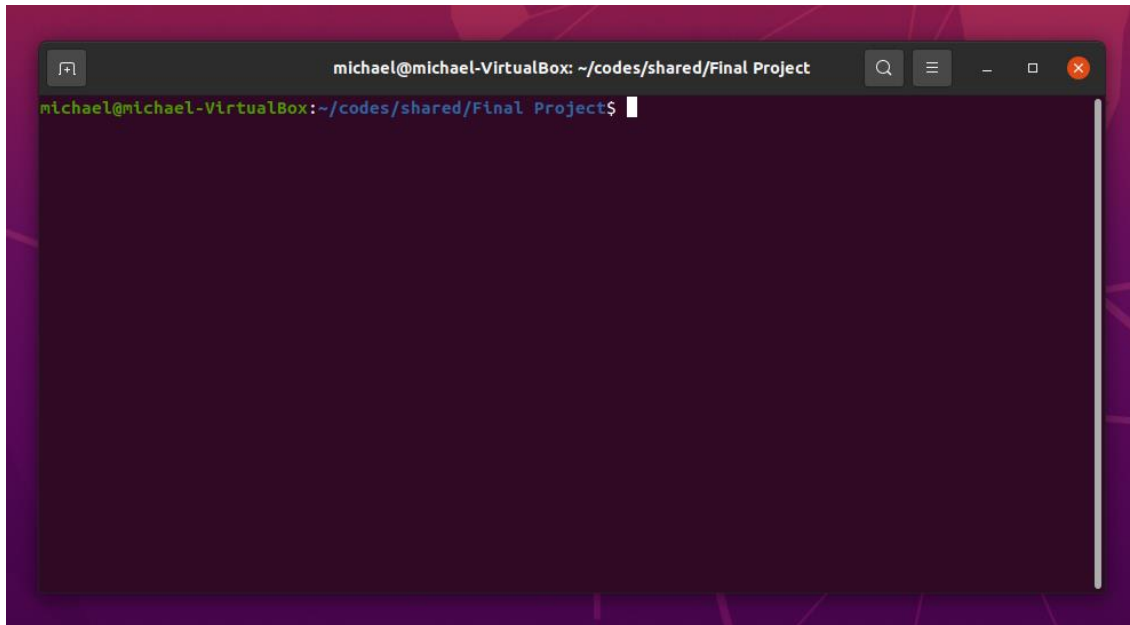

Figure 1: Locate file location using `cd` command

Step 2: Opening the Server

- The server must be opened and running in order for clients to connect
- Any client can join the server assuming the machine is located on the same network as the server.
- Run `./server` in the terminal to execute the server

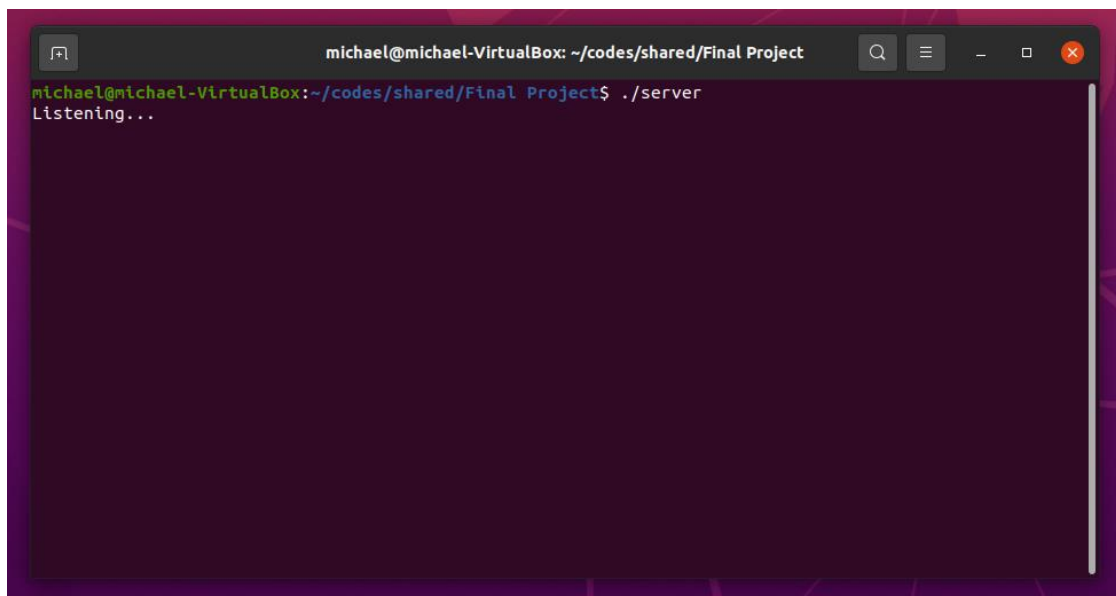

Figure 2: Open server up to connect clients to chat room

Step 3: Add Client Into Chat Room

- Maximum of 20 clients are available to be created
- Clients must be on the same local network that the server is on
- Run `./client` in the terminal to execute the client
- No duplicate usernames can be used
- Send 'exit' to close client

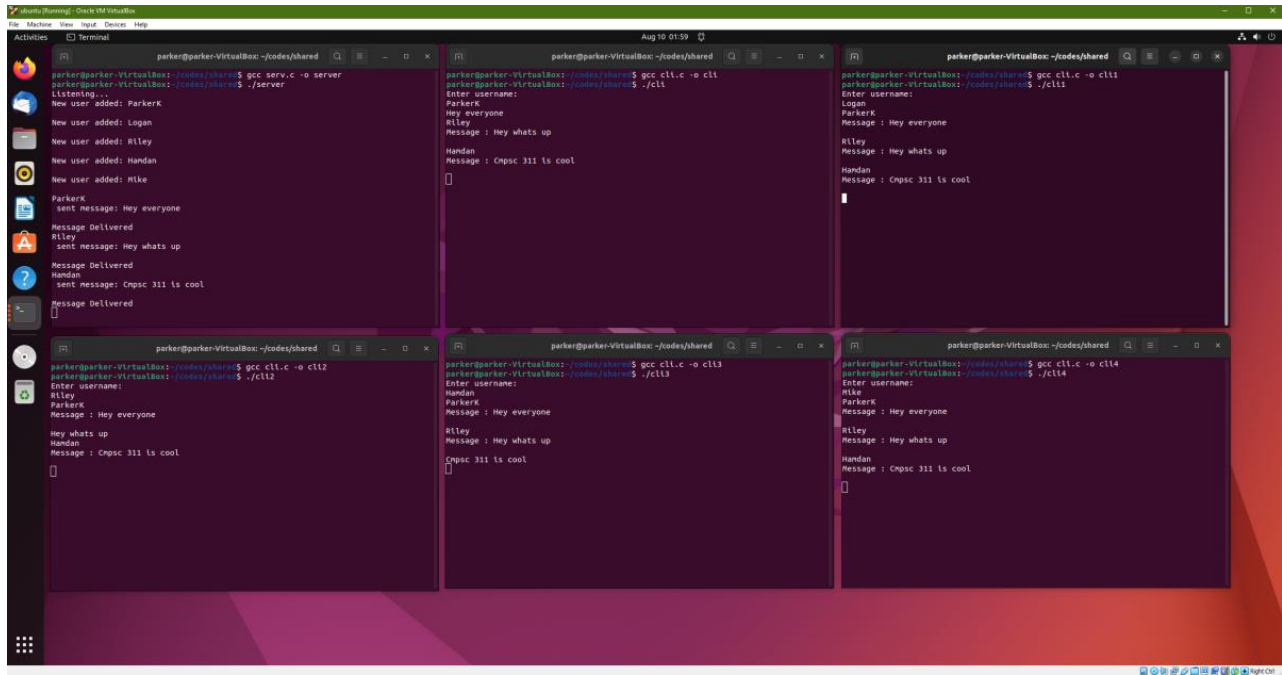

Figure 3: Shows multiple clients communicating in chat room
